## Peach Seed.

CROP OF 1893.

A few hundred bushels from specially chosen orchards, saved under my own direction and intended for my own use, but have more than I need. They are not city canning house seed, and the difference in value is apparent to intelligent propagators. All kinds of fruit from all kinds of orchards go to city markets. See!!

Price of above in barrels and placed on board steamer or cars: \$1.00 per bushel in 100 bushel lots or over. \$1.25 per bushel in smaller lots.

Hon. P. J. Berckmans, Augusta, Ga., President; Chas. L. Watrous, Des Moines, Iowa, First Vice-President; Geo. C. Brackett, Lawrence, Kansas, Secretary; Benj. J. Smith, Cambridge, Mass., Treasurer. Place of next meeting: Sacramento, Cal., in January, 1895.

We purpose to mail this paper to every nurseryman, florist and seedsman in the United States, and to leading firms in the same vocations in foreign countries. We do not solicit subscriptions. If you value THE PRACTICAL NURSERYMAN, please accept it with our compliments

### Improved Russian Mulberry.

AN OPEN LETTER.

JUNCTION CITY, KAN., Oct. 25, 1894.

MR. W. F. HEIKES, HUNTSVILLE, ALA.

DEAR SIR:—As you ask for descriptions of improved Russian Mulberries, we answer that we have an everbearing one. It begins to ripens early in June, and this year had fruit on until the 15th of September. We shook off a gallon every morning, as long as we wanted them, from a tree one foot in circumference. Had the fruit all ripened at once, of its usual size, there would not have been room on the tree for it, and no tree could have stood up under the weight. You would take it for the Snyder blackberry, if it was not for the stems. It is quite acid, and is a fair substitute for raspberries.

Respectfully,

W. CUTTER & SON.

### Charles Downing Plum.

This new plum has not been disseminated or tested to any extent outside of the State of Iowa. It originated with the writer about five years ago, in this (Pottawattomie) county, and has been pretty well tested in this vicinity. It prove to be one of our best varieties for market, and every successive year's fruiting of it increases its popularity. Its large size, fine quality and wonderful productiveness, are three strong points to recommend it. Its color, a light mottled crimson, makes it very attractive in the package. It is a seedling of the Wild Goose, and commences to ripen about the same time, or perhaps a few days later than its parent, and continues to ripen in succession for a month or more after Wild Goose is gone. On account of its firmness it is a fine shipper, and will remain in the package for several days without spoiling. The tree is a strong and healthy grower, but rather low and spreading, and requires some care in pruning when young to prevent its splitting down when older and

loaded with fruit. So far as tested, it is perfectly hardy. \* \* \*—H. A. Terry, in *Prairie Farmer*.

Mr. Terry informs us by letter that the Charles Downing plum is larger, firmer and a very much better market plum than Wild Goose. It will bear three bushels to one of Wild Goose.—W. F. H.

#### Cherries in Russia.

Prof. Hansen, of Iowa, who has been traveling in Russia, writes that he finds on the Moscow markets great quantities of the Vladimir cherries. They come mainly from a district 100 miles east of Moscow, where immense tracts are planted with this cherry. The fruit is shipped by car-loads from these far Northern cherry orchards to all parts of European Russia and in Asia. "On the sparrow hills, which are merely bluffs south of the city of Moscow, I also found large orchards of a cherry closely resembling the Vladimir. The Vladimir is as large or larger than Early Richmond, with a small pit, is black in color, with highly colored juice, quite firm flesh, and of delicious quality. It would be called a notable fruit at any point in America. The cherries are marketed in round flat wooden boxes, holding about fifteen pounds. It is propagated by sprouts and sometimes by seeds, as it is an established race and comes nearly true from the pit. The trees may be called large bushes as grown here. Often they are grown with several stems like a bush. They are grown on the renewal plan, as experts grow the grape, currant and gooseberry, but with this bush cherry the old wood is cut at larger intervals of from eight to ten years. These bush-cherry orchards are a source of great profit."

#### Japanese Plums.

Mr. Joseph Meehan, of Meehans' Monthly, has the following to say about the Japanese varieties of plum:

"Looking over the field of fruits, I think the most notable advance has been with plums. That the Japanese sorts are of great value is beyond doubt. Besides their excellent quality they are most healthy growers, and they have proved quite hardy as far north as the vicinity of Lake Ontario, where many sorts have been successfully fruited. Then, again, some of the sorts ripen much earlier than others before grown; one of them, the Willard, having ripened its fruit at Geneva, N. Y., as early in the

season as the 15th of July. The names of some of the best are as follows: Burbank, Botan, Chabot, Satsuma, Willard, Abundance, Ogon and Kelsey. Of these, Willard is the earliest, and Kelsey the latest. The last named one is not so hardy as the others, but in the South it is greatly esteemed. Some of those who have grown these plums say the fruit is less liable to curculio attacks than other sorts are, but this will matter but little, as no good grower expects to get along now without the aid of poisonous mixtures for the destruction of insect and fungus pests. A trial of these Japanese plums can safely be advised."

Another good point with the Willard Plum is that it ripens its foliage earlier than any of the other varieties of Japanese Plums.

It is a remarkable fact in botany that no species of flower ever embraces, in the color of its petals, the whole range of the spectrum. Where they are yellows and reds there are no blue; when blue and red occur there are no yellows, and when we have blues and yellows there are no reds. Tulips come nearer to covering the whole range of the spectrum than any other species. They can be found ranging through reds, yellows and purples, but a blue one never has been found.—*Garden Work*.

#### Odors.

It must not be thought, that in order to excite our olfactory nerves agreeably, it suffices to mix, in any proportions and in any manner, odors which isolated, are agreeable any more than it would suffice to drum upon a piano in order to play a harmonious air. There is, says Mr. Piesse in his treatise upon perfumes, an octave of odors, just as there is an octave of notes; certain perfumes united with each other like the sounds of an instrument. Thus, bitter almond, heliotrope, vanilla, and clematis blend very well, each of them producing nearly the same impression in a different degree. On the other hand, we have lemon, orange peel, and verbena that form a higher octave of odors, and which associate with each other likewise. The analogy is completed by what we call semi-odors, such as rose with rose geranium for a half tone.

It is curious to note that upon mixing a small number of perfumes in definite proportions, we can obtain the majority of the odors of flowers, with the exception of that of jasmin, which is sui generis.—*Scientific American*.

## THE HUNTSVILLE WHOLESALE NURSERIES PRICE LIST.

## THE HUNTSVILLE WHOLESALE NURSERIES.

In this issue of our price list we show the numbers, sizes and prices in all varieties remaining unsold at this date. Correspondents should, however, give us the privilege of substituting varieties, sizes and prices, as far as it can be allowed, if in a hurry for shipment, as we do not substitute, as a rule, without permission.

An error was made in printing the prices on Chickasaw varieties of plums in this issue of our list. The prices should be the same as printed in the October number, which is considerably lower. There is also an error in printing the special price on Kieffer pears 3 to 5 feet. It should read 3 to 5 feet @ \$55 per M. instead of \$35. See quotations of special prices on other things, and some changes in sizes and prices on Kieffers under regular heading.

We are now shipping North for cellar-ing. Northern customers wishing to lay in a supply for Spring should correspond with us promptly. Special prices on car lots to be shipped this Fall.

Kieffer Pears, two years old, are very scarce. Our big one year trees will do. See our quotations.

Our low prices on Cherries are printed in the right place in this issue. Will give special prices on car lots to be shipped this Fall.

We are sold out of Wragg, Eng. Morello and Ostheim, two years old. We have a good supply of one year olds, 2 to 3 feet. See October list for prices.

The Baltimore Belle and Queen of Prairie Roses we offer at \$30 and \$25 per 1000 are very fine plants,—as fine as can be bought anywhere. Will send samples if desired.

See our quotations on Figs. We have have a large stock of Celestial—the hardest and best sort for canning and preserving.

Notice the price made on Standard Pears,  $\frac{3}{4}$  to 1 inch and 11-16 to  $\frac{3}{4}$  inch, this month. We have a surplus of Bartlett's, and will make special prices on them in car lots.

## THE HUNTSVILLE WHOLESALE NURSERIES.

## Distributing Points.

We are making St. Louis, Mo., Cincinnati, Ohio, Rochester, N. Y., Philadelphia, Pa., and Fort Worth, Texas, distributing points; and will deliver free of freight charges to transfer companies, at either of these places, all orders in car lots, or in less than car lots, to be shipped from Huntsville on the dates named below:

For St. Louis—Early shipments from September 20th to October 10th; late shipments from October 25th to November 10th.

For Cincinnati, Rochester, Philadelphia and Fort Worth—November 1st.

The orders will be packed in Huntsville, and those for less than car lots will be combined to make up car lots and shipped to these points and distributed promptly to the various railroads centering there. This plan insures quick time and low freight rates. Orders for less than car lots must be boxed at Huntsville. The price of boxes will be additional.

This offer to deliver to distributing points free of freight charges will not apply to less than car-lot orders, if shipment is required at other than the above named dates; but we will ship car-lot orders at any time after September 20th anywhere desired within the territory tributary to the cities designated, and will deduct from the bill the cost of freight to the nearest distributing point.

Nursery stock ripens earlier and consequently is ready for digging sooner in Huntsville than in nurseries further north.

We are the largest propagators of Japanese Plums, and have on hand the most complete assortment to be found in any nursery. More, that our varieties are correctly named and may be accepted as the standard in nomenclature.

We have a large stock of *Prunus Pisardii* on Marianna stocks; fine low heads, two years old, very handsome. See special prices.

We have a large stock of Orange and Meech's Prolific Quinces one year, from one foot high and upwards. Good plants true to name are scarce. Our trees are grown from grafts, made of cions taken from bearing orchards, and we know them to be pure.

Always address all correspondence to

W. F. HEIKES, Manager,  
HUNTSVILLE, ALABAMA.

## Terms and Conditions Governing Quotations in the Price List of the Huntsville Wholesale Nurseries.

**RATES.**—As we send this list to the trade only, we make the difference in prices between the 10, 100 and 1000 rates very slight—simply sufficient, as a rule, to cover the difference in the expense of handling in the smaller numbers. We uniformly tie in bunches of 10, when consistent with the order, and we suggest to our customers to make their orders for varieties in multiples of 10 as far as practicable. Orders for 50 and not over 300 trees, if for not less than 10 of a variety, will be charged at the rate per hundred. Orders requiring 300 trees or more, and not less than 10 of a variety, will be filled at the lowest quoted prices. Orders for less than 10 trees of one variety, will be charged at the rate per ten.

**SEASON.**—Our packing and shipping season begins by the 20th of September, and continues until about the first of March.

We have great advantages to offer here in early shipments for the North in Spring. We do not accept orders for trees we do not grow, as we never buy trees to sell again. You can depend upon us for fresh dug trees. Each order is taken up separately, and not until it is wanted for shipment.

**SHIPPING DIRECTIONS.**—We respectfully beg our patrons to furnish us with explicit *directions as to shipping*, and the mode of conveyance by which they desire trees forwarded. When no particular directions are given, we forward according to the best of our judgment. *But in no case do we assume any responsibility as to safe delivery and condition of Trees and Plants after a proper shipment by us.*

**RELEASE.**—When prepayment of freight is not required, we will Release and Guarantee, and take forwarder's receipt and mail to consignee. It is left to the option of the shipper of trees over some railroads, whether he will release them or not under the clause "Value less than \$5.00 per 100 lbs." If released under this clause, the freight is less on roads governed by this classification, and we will assume it to be proper to make this release, without reference to the value of the trees, unless instructed to the contrary. This clause does not apply upon roads under some of the district classifications, and because of this confusion we will not be held responsible for any oversight to release, unless instructed by our customers. Claims for delay or loss must be made to the forwarders.

**PACKAGES.**—The cost of package must be added to the prices quoted in this list, as follows:

Boxes 30 inches square, from 7½ to 9 feet long, as the trees may require, each \$2.50; boxes 24 inches, \$2.00; boxes 18 inches, \$1.50; bales from 25c. to 75c. each.

**PACKING.**—Goods will be packed in moss, and especial care taken to insure their arrival in the best condition.

**ASSORTMENTS.**—We do not require customers to take an assortment they do not wish, but will sell one variety alone if desired. If any substitution can be allowed, either in grade or variety, it should be so stated when making the order. As a rule we do not substitute without permission.

**CAUTION.**—We accept all orders upon the condition that they shall be void, should any injury befall the trees from frost, hail, storm, fire, or other causes over which we have no control.

**TERMS.**—Cash. When desired, we will allow 30 to 60 days from date of shipment, to responsible.

prompt-paying customers. Parties with whom we have had no business transactions, will save time by sending reference, Bank, if possible, with order. We wish it expressly understood that payment is expected from the first collections made, and the time named is only intended as so many days of grace in which to make returns. To northern customers, who wish to lay in stock for Spring trade, we will ship late in Fall or early in Spring, and allow time for payment till May 15th. If shipment is required in the Fall for Spring use, a note is to be given upon receipt of the trees. We do not allow any discount for cash, but we make our prices low to command cash, or prompt returns. In orders when the time is not mentioned, 30 days is to be understood. Interest at the rate of 8 per cent. per annum must be paid on over due accounts. Should prices be changed, either higher or lower, during the season, the prices ruling at the time the order is made, are expected to stand.

**FORMS OF PAYMENT.**—All bills are payable at the office of the seller, and remittances should be made by drafts on New York, Chicago or St. Louis, or by money orders on some Express Company, or by postal orders. We will, however, accept checks from those of our customers who may be located at places having no banking, express or postal facilities, provided they make them in every case payable "with exchange", or add ¼ of one cent, to the amount of the bill for the cost of collection.

**GRADES.**—We grade very carefully, in some cases by caliper, in others by height. When graded by both caliper and height, the caliper must govern, as the height then named is only to be considered approximately. When graded by height or caliper, we include the lower number and exclude the higher. Instance: in a grade of 4 to 5 feet trees, the 4 feet trees are included, but not the 5 feet trees. If 5 feet trees are wanted, the 5 to 6 feet grade must be ordered.

**GUARANTEE OF GENUINENESS.**—While we exercise the greatest diligence and care to have all our Trees, etc., true to label, and hold ourselves in readiness, on proper proof, to replace all trees, etc., that may prove untrue to label, free of charge, or refund the amount paid, it is mutually understood and agreed to, between the purchaser and ourselves, that our guarantee of genuineness shall in no case make us liable for any sum greater than that originally received for said trees, etc., that shall prove untrue.

**ACCEPTANCE.**—Notice should be sent us by telegraph, at our expense, if there is any cause of complaint, or should the trees be refused, stating reasons. Claims for deduction, from whatever cause, will receive consideration only when made promptly upon the receipt of the trees. If trees show any signs of shrivelling upon arrival, they can usually be restored by being thoroughly watered and buried entirely under the ground for two or three days. Should there be any frost in the trees upon arrival, they should not be removed from the box until the frost is all out. The box should be placed in the cellar or protected in some other way. The presence of frost in the boxes is not to be considered an evidence of bad condition, as we pack to secure the trees against damage, if the frost is allowed to come out in the natural way. Goods will be considered accepted if removed from the boxes in which they are packed, without notice of complaint to us, and without our orders for their disposition.

## HARDY SHRUBS

### AT HALF PRICE.

We wish to give all our attention to the Fruit Department, and offer our entire stock of Ornamentals at prices some distance below ROCK BOTTOM.

Trade List now ready. It will pay you to write us. We have plenty of STRAWBERRIES, &c.

THE ROGERS NURSERY CO., Moorestown, N. J.

ISAAC C. ROGERS, MANAGER.

# NURSERYMEN'S CALIPER.

( $\frac{3}{8}$  SIZE.)

The above is a cut of this new caliper, which is made of brass and handsomely nickel plated; its size is such that it can be readily carried in the vest pocket.

Its advantages are that it is always set, and a jar or fall does not alter the size, as in the old opening and closing style. The size is plainly stamped on each notch, making it unnecessary to measure with a rule after having gauged the tree. We think that both nurserymen who are grading stock up for sale, as well as tree dealers who are buying, will find this little article a most valuable addition to the list of nurserymen's supplies.

PRICE 50 EACH. \$2.50 FOR SIX. \$5.00 PER DOZEN.

W. F. HEIKES, Manager, Huntsville, Ala.

## Nashville, Chattanooga & St. Louis RAILWAY.

## L. G. THOMPSON, TOMAH, WIS.

DEALER IN

## SPHAGNUM MOSS

—AND—

## EVERGREENS

I can supply any amount of Moss wanted, either dry in bales, or damp in bulk.

Try our beautiful Xmas Trees. I pack them so they do not break in shipping. I have 20 years experience in handling these goods.

By placing your orders with me you will receive the fairest treatment and the full value of your money. (113)

## FRANK HANCOCK,

MATHERS, WISCONSIN,

DEALER IN

## SPHAGNUM MOSS.

I am absolutely the only dealer in this vicinity who owns the swamp from which the moss is taken, and I personally superintend getting out the moss for my customers. I can therefore guarantee my moss to be of the very best quality and the bales to be of the largest size. Moss can be supplied in any quantity desired, either in bulk or in bales. Be sure to get my prices before placing your orders elsewhere. (4512)
